Mechanics of Materials 4 (1985) 461–462
North-Holland

# AUTHOR INDEX VOLUME 4 (1985)

(The issue number is given in front of the page numbers)

**Asaro, R.J.,** Material modelling and failure modes in metal Plasticity (3,4) 343–373
**Asaro, R.J.,** *see* **J. LeMonds** (3,4) 417–435

**Beltzer, A.I.,** *see* **R. Parnes** (1) 17– 26
**Benveniste, Y.,** The effective mechanical behaviour of composite materials with imperfect contact between the constituents (2) 197–208

**Carman, R.A.,** *see* **M.M. Carroll** (3,4) 409–415
**Carroll, M.M.** and **R.A. Carman,** Discussion of: *Influence of yield surface curvature on flow localization in dilatant plasticity,* M.E. Mear and J.W. Hutchinson. (3,4) 409–415
**Chen, W.F.,** *see* **D.J. Han** (3,4) 283–302
**Chihab, A.,** *see* **A. Dragon** (3,4) 95–106
**Clifton, R.J.,** *see* **R.W. Klopp** (3,4) 375–385
**Costin, L.S.,** Damage mechanics in the post-failure regime (2) 149–160
**Cowin, S.C.,** The relationship between the elasticity tensor and the fabric tensor (2) 137–147

**Davison, L.,** Discussion of: *A statistical theory of fragmentation processes,* J.K. Dienes (3,4) 337–341
**Dienes, J.K.,** A statistical theory of fragmentation processes (3,4) 325–335
**Dragon, A.** and **A. Chihab,** On fine damage: ductile fracture-damage evolution (1) 95–106

**Evans, R.W.** and **B. Wilshire,** An analysis of the creep fracture characteristics of austenitic-ferritic steel transition welds (1) 51– 65

**Grady, D.E.** and **M.E. Kipp,** Mechanisms of dynamic fragmentation: factors governing fragment size (3,4) 311–320

**Hageman, L.J.,** *see* **G.A. Hegemier** (2) 161–179
**Han, D.J.** and **W.F. Chen,** A nonuniform hardening plasticity model for concrete materials (3,4) 283–302
**Hashin, Z.,** Analysis of cracked laminates: A variational approach (2) 121–136
**Havner, K.S.,** *see* **N.T. Le** (1) 33– 50
**Hegemier, G.A., H. Murakami,** and **L.J. Hageman,** On tension stiffening in reinforced concrete (2) 161–179
**Hegemier, G.A.** and **H.E. Read,** On deformation and failure of brittle solids: Some outstanding issues (3,4) 215–259
**Hughes, T.J.R.,** Discussion of: *A numerical study of localized deformation in bi-crystals,* J. LeMonds, R.J. Asaro, and A. Needleman (3,4) 437–438
**Hutchinson, J.W.,** *see* **M.E. Mear** (3,4) 395–407

**Iwasaki, R.,** *see* **K. Tanaka** (1) 27– 32

**Kipp, M.E.,** *see* **D.E. Grady** (3,4) 311–320
**Klopp, R.W., R.J. Clifton,** and **T.G. Shawki,** Pressure-shear impact and the dynamic viscoplastic response of metals (3,4) 375–385
**Krajcinovic D.,** Discussion of: *A nonuniform hardening plasticity model for concrete materials,* D.J. Han and W.F. Chen (3,4) 309–310

**Laws, N.,** A note on penny-shaped cracks in transversely isotropic materials (2) 209–212
**Le, N.T.** and **K.S. Havner,** Analysis of tensile loaded f.c.c. crystals in 4- and 8-fold symmetry (1) 33– 50
**LeMonds, J., R.J. Asaro** and **A. Needleman,** A numerical study of localized deformation in bi-crystals (3,4) 417–435

**Mear, M.E.** and **J.W. Hutchinson,** Influence of yield surface curvature on flow localization in dilatant plasticity (3,4) 395–407
**Meyers, M.A.,** Discussion of: *Pressure-shear impact and the dynamic viscoplastic response of metals,* R.W. Klopp, R.J. Clifton, and T.G. Shawki (3,4) 387–393
**Mura, T.,** A note on the crack opening displacement (2) 213–214
**Murakami, H.,** *see* **G.A. Hegemier** (2) 161–179

**Nagtegaal, J.C.,** Discussion of: *On the computational significance of the intermediate configuration and hyperelastic stress relations in finite deformation elastoplasticity,* J.C. Simo (3,4) 453–455
**Needleman, A.,** *see* **J. LeMonds,** (3,4) 417–435
**Nemat-Nasser, S.,** Discussion of: *Geometric probability approach to the characterization and analysis of microcracking in rocks,* Teng-fong Wong (3,4) 277–281
